Field Checklist of The Birds of Arizona

Edited by Kurt A. Radamaker Updated March 15 2020

1	Observer(s) Date	Time	Total Species
2	Date Weather	Time	Total Species
3	Observer(s) Date Weather	Time	Total Species
4	Date Weather	Time	Total Species
5	Observer(s) Date	Time	Total Species

Field Checklist of The Birds of Arizona

This checklist contains 565 species of birds that have been accepted by the Arizona Bird Committee as of January 2020. An additional 8 subspecies that occur in Arizona and are reviewed have been included. Identifiable subspecies and their common names are derived from eBird Taxonomy, available online at: http://ebird.org/

The species list conforms to the American Ornithologists' Society (AOS), checklist order and nomenclature as of the 60th supplement published June 27, 2019.

Checklist annotations:

- n = Has bred in Arizona (308 taxa). A species that has hatched young at least once, however, this does not include hybrid offspring.
- [] = Species in brackets have not been physically documented in Arizona (2 species)
- * = Arizona Bird Committee review species (157 taxa)
- **italics** = Species in *italics* are identifiable review forms (8)
- (int) = Introduced (8 species)
- (ex) = Extirpated (4 species) previously bred or presumed to have bred in Arizona, but no longer occur naturally. They may have been reintroduced but remain unestablished.

Species or subspecies marked with an asterisk (*) should be documented with photographs and or written details. Reports of Arizona Bird Committee review species (*) may be submitted online to the Arizona Bird Committee at the Arizona Field Ornithologists Website at: www.azfo.org.

layout and design by Kurt Radamaker

Checklist last updated: March 15 2020
